

## Sci, Tech, Soc in Mod Era (Spring 2018)

Instructor: **Mariscal, Carlos**  
Subject: **CH**  
Catalog & Section: **212 1103**  
Course ID: **22531**  
Objectives:

Enrollment: **10**  
Responses Incl Declines: **10**  
Declines: **0**

### Teaching (Lab) (7 comments)

**Q: Please provide your thoughts on the teaching assistant (or lab faculty), including strengths and areas for possible improvement.**

- 1 Carlos obviously has a lot of knowledge pertaining to the subjects covered in class. This was really helpful because it allowed us to connect the stuff we were learning and reading to outside information that would help us understand it better.
- 2 Dr.Mariscal was a very relatable and knowledgeable professor. I very much enjoyed his teaching skills.
- 3 Very interesting TA I enjoyed going to discussions much more than lectures.
- 4 I like how you didn't force people into participation like Dr. Walker did and you seemed to understand some people were there because they were required to be there. I do think it was nice of you to end lab early sometimes, and you were always there to answer questions. In other words, I liked how we could learn a lot if we wanted to put the effort in, but you didn't force us to.

**Q: Please provide your thoughts on the lab as a whole, including strengths and areas for possible improvement.**

- 1 The discussion section was really helpful. The discussion allowed students to talk about their own interpretations and opinions regarding the subject material. It was helpful in hearing other people relate the material to other stuff they have learned because, personally I don't have background knowledge on the material, so it helped hearing some more information as to why certain things were happening.
- 2 I wish that I learned about the course material a little more in the discussion.
- 3 It would be nice if it was not mandatory. I think that the labs should be an optional supplement like lecture.
