Professor Mariscal was very good at explaining the material. As well as making it interesting, he was able to put the content into simpler words so I could understand. He was also able to bring everyone into discussion well, so I was able to listen attentively and learn a lot from that.

Please provide your thoughts on the lab as a whole, including strengths and areas for possible improvement.

Professor Mariscal was very helpful in helping me understand the material in the lectures. He made the reading material easy to understand, and the assigned readings were easier to understand when he analyzed it deeper with us. He explained the content in a very simple explanation during discussion, and made the material very intriguing and easy. He was an easy, straight forward grader when evaluating the essays and exams.

Please provide your thoughts on the lab as a whole, including strengths and areas for possible improvement.

The discussion sections were very helpful to understand the material better. The journal entries felt really long and boring to complete, but the journals were easy and helped me with the content discussed in class. The smaller discussion groups made it easier to ask questions and get help when needed.

I liked the discussion and the fact that we were meeting on a smaller scale and got more face time with an instructor. I think some improvements would could include allowing time in discussion to help students come up with paper topics. Also more test review during discussion would be more helpful.
